

LZR[®] - VS305

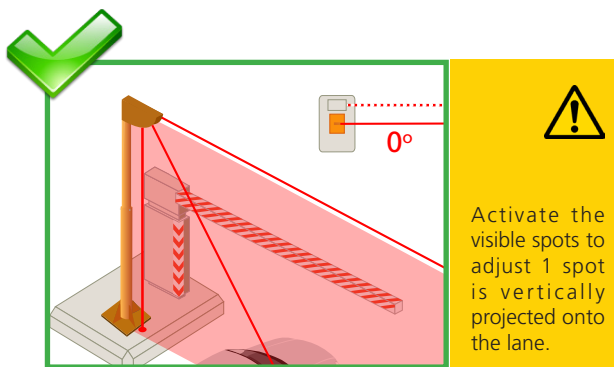

Installation Application Note

LZR[®] - FLATSCAN VS305 is a detective laser scanner with a single curtain which is especially suitable for vehicle separation. Please always keep the laser scanner correctly positioned to make sure normal functioning.

INSTALLATION TIPS

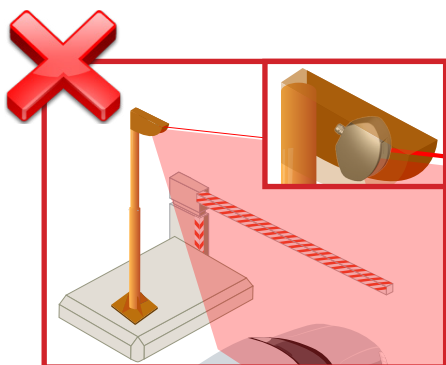

Install the laser scanner at a mounting height of 1.6 ~ 1.7m to the lane*.

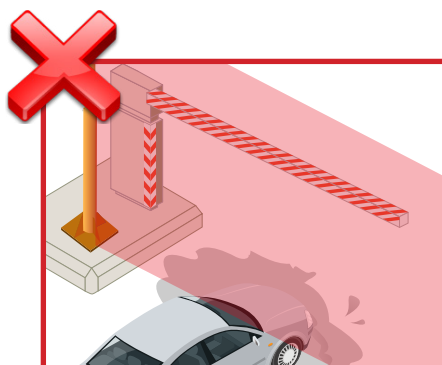

Ensure the detection field horizontally parallel to the lane and vertically perpendicular to the lane through visible spots.

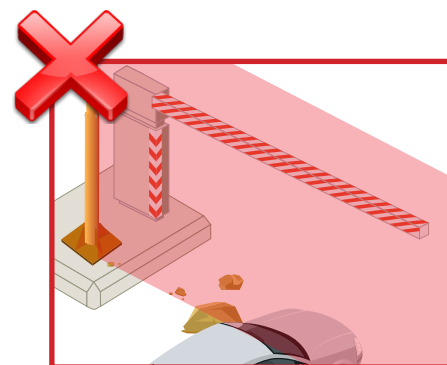

Activate the visible spots to adjust 1 spot is vertically projected onto the lane.

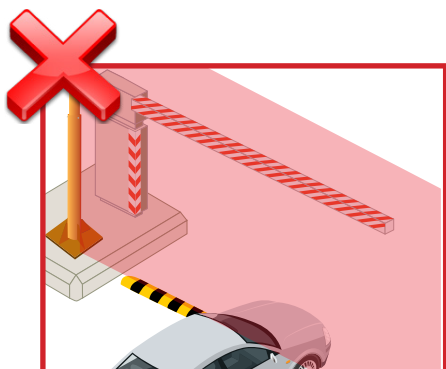

Avoid installing the laser scanner with the wrong angle.

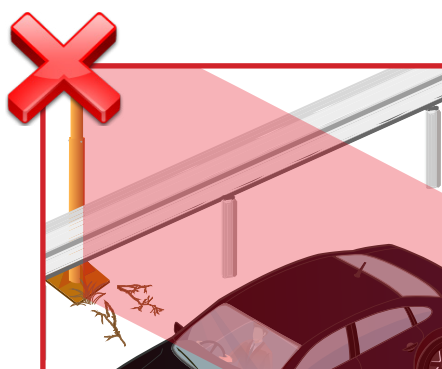

Avoid the presence of plenty of water.

Avoid the presence of waste, such as clods and moving objects.

Avoid the presence of reflective objects such as metal objects and speed bumps.

Avoid the presence of weeds or branches when installing the laser scanner along the roadside.

*In most cases, it is recommended to test according to the actual situation on site.
